REGISTER!

Join us for ICAR's first educational webinar! To address infection prevention gaps across the healthcare spectrum, the ICAR team will offer quarterly webinars to facilities to discuss priority areas of improvement observed by the team on their visits. This webinar will premiere **three videos created by the ICAR team** to educate staff on infection prevention, and share a **leader discussion guide** to stimulate discussion among healthcare staff.

The ICAR videos were created to start a dialogue between the ICAR team and direct patient care providers in various settings. Glucometer use and cleaning, cleanliness of the medication preparation area, and injection safety may appear to be separate practices, but all of these areas overlap significantly in the care of your patients.

You can register at <https://attendee.gotowebinar.com/register/7436564868756657409> or by clicking the link above. After registering, you will receive a confirmation email containing information about joining the webinar.
